

Cashout and TipShare Module

This module works with Squirrel POS to create a clean easy to read and use cashout screen. The screen brings together all the information owners and managers want to see about any given cashout. Tipout amounts are stored and the Tipout screen can be used to distribute the tipout amount to Host(ess), Bartenders or any job that is currently setup in Squirrel. If you are using one of Cabaret Developments payroll export modules the tipshare will be recorded and added to the employee income.

The cashout and tipout module is another in a series of modules that Cabaret Development has written as part of the next generations of software

- Reads all data from Squirrel POS
- Automatically populates the grid
- Only box to edit is cash received.
- Distribute tip share easily
- Color coded amounts for over short
- Tips share report
- Cashout Report

Tip Share

Select Tip Out Date
Friday , November 28, 2008

AM (Lunch) PM (Dinner)

Total Tipshare 159.63
